

Maintenance Parts

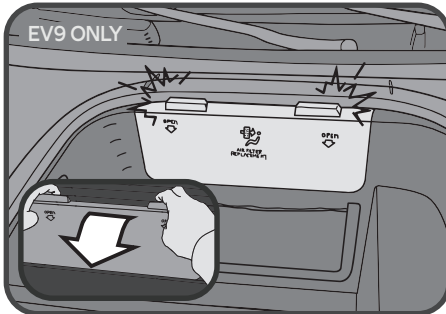

Follow the steps below for replacement.
Reassemble in reverse order once complete.

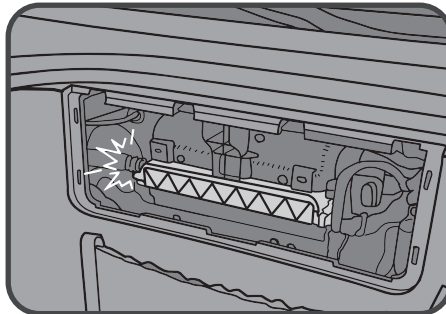

1. Open the hood

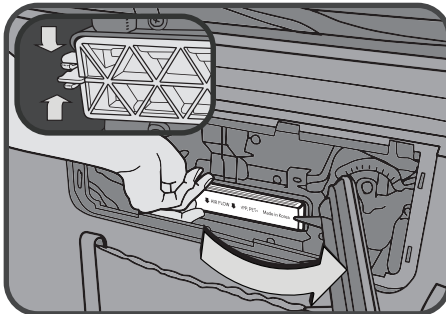

2. Carefully pull the top center of the vertical HVAC access cover forward to release the retention clips. Then, remove the cover from the vehicle. [Go to step 4]

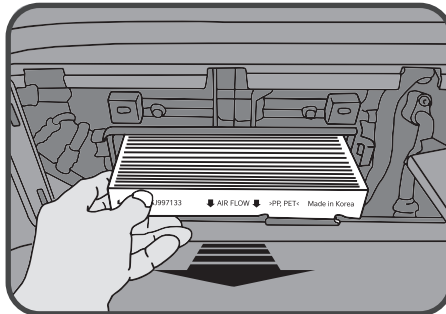

3. Carefully pull the tabs forward to detach the HVAC access cover.

4. Squeeze the tabs on the left side of the cabin air filter access cover up and down, then pull the cover to remove it.

5. Grasp the edge of the filter and pull it straight out.

6. Ensure the airflow arrow points downward, then reinstall all components in the reverse order of disassembly.

Ensure the filter is installed in the correct direction. Handle with care to avoid damaging surrounding parts. Incorrect installation may result in abnormal noise and reduced filtration efficiency.

PREMIUM CABIN AIR FILTER / CABIN AIR FILTER

Installation & Replacement Guide

EV6, EV9
